# CLIPTRAINING™

Modernized approach to
Learning

Self-Service Training Videos

Over **5,000 short videos** provide recorded answers for Microsoft 365 "how-to" questions.

Users improve productivity by quickly finding the information they need, exactly when they need it.

5,000
Task-based videos

Improves knowledge retention

Training videos provide short, task-based information so users can apply their learning immediately and actively retain their new skills.

Reduces help desk calls

"How-to" related calls to the help desk are greatly reduced. Some organizations report a 60% reduction after deploying ClipTraining.

Now Available Inside TEAMS

Native application running in Teams provides a streaming service for technology training videos and job skills enablement content.

Learn what you need, exactly when you need it!

Configurable Learning Paths

Administrators can group training videos to create recommended learning combinations for users by job role or onboarding needs.
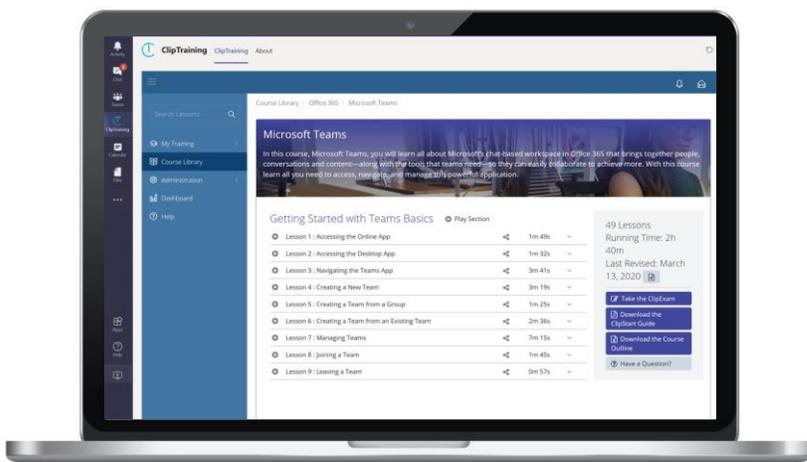

Includes Gamification Awards

Customizable award-based training models for users and teams. Monitor user activity and promote the advanced learners.

Videos Created by Tech Experts

All training videos were designed and recorded by Microsoft MVP's on their focused technologies.

Available from any Device

Training videos provide short, task-based information and examples from any device so users can get their work completed from anywhere.

Videos available on mobile devices to provide **job skills training for front-line workers.**
