

Requirements and Test Session Information

We are dedicated to ensuring that every student who attends technical training with LRS Education Services comes away with the knowledge, skills, and expertise they need to do their best work.

Test Your Equipment PRIOR to the First Day of Class!

LRS utilizes Learn On Demand Systems (LODS) to establish labs online and remote connectivity subject to availability. LRS will provide your email address to LODS for purposes of lab access and class recording.

Learn On Demand Systems (LODS) is a dedicated, preconfigured remote training lab environment created especially for technical professionals so they may practice and apply what they've learned in our technical training classes during and after the class.

1. To fully participate in our online labs during training, you will need to ensure your system is equipped with the necessary requirements:

[LRS Connectivity/Lab Test](#)

1. Login as the following:
 1. Username: **LRSTest**
 2. Password: **password**
2. Click the "Enter Configuration Room" button
3. Click the "Launch Test Lab" button next to the "Test Virtual Lab Environment (Hyper-V)"
4. The Lab will be online for approximately 5-15 minutes and may kick you out after testing. This is a compatibility test and not an actual virtual lab environment.

Do you need additional help? Check out our [FAQ](#) page.
